Digital Tenders - Online Tender Management System

Digital Tenders is an intuitive, web-based application that provides the essential functionality that organisations need to manage tendering, procurement and contracting effectively to reduce cost, increase efficiency, improve transparency and reduce risk.

Right out of the box, Digital Tenders provides an easy to use, yet sophisticated tender management toolset that enables organisations to publish tender notices and bid documents; list tenders as public or private; manage vendors; accept bids securely online; access complete audit logs; and fast track productivity easily from any web browser.

Digital Tenders is the first and only online tender management system in the Caribbean and is positioned to transform the procurement and contracting process from the traditional paper based environment to an electronic one.

This solution is fully customizable and is specifically targeted at medium and large organisations who wish to have their own branded online tendering system and want the option to accept secure and encrypted electronic bids online.

World Class Solutions for Enterprise Tender Management

The Challenge of the Traditional Tender System

- Management of tender notices and bid packages and the administrative overhead and printing cost involved.

- Perceived poor transparency in the tendering process.

- Restriction to the traditional local pool of bidders with limited access to an expanded CSME regional market and global bidders.

- Limitations of the traditional wooden tender box.

- Lack of a secure audit trail for the entire tendering process.

Online Tender Management System

Why Digital Tenders?

It's Convenient:
Manage the entire tendering process electronically with the option to accept bid documents securely online via your very own secure and encrypted Digital Tenders e-Box.

It's Cost Effective:
All your electronic bid documents can be placed online making it easier for bidders to obtain tender documents, drastically reducing overhead costs of printing and advertising.

It's Flexible:
It is web-based and offers cross-platform, cross-browser support. It is designed to be fully customizable to the needs of your organisation.

It's Efficient:
Bidders can be automatically notified of tenders via e-mail thus reducing the tendering application time.

It's Secure:
Features include multiple levels of security and permission controls, support for Secure Socket Layer (SSL) and document encryption.
